## Preferred Alternative

## I-80 Mainline in Design Modification

## Design Modification to Preferred Alternative

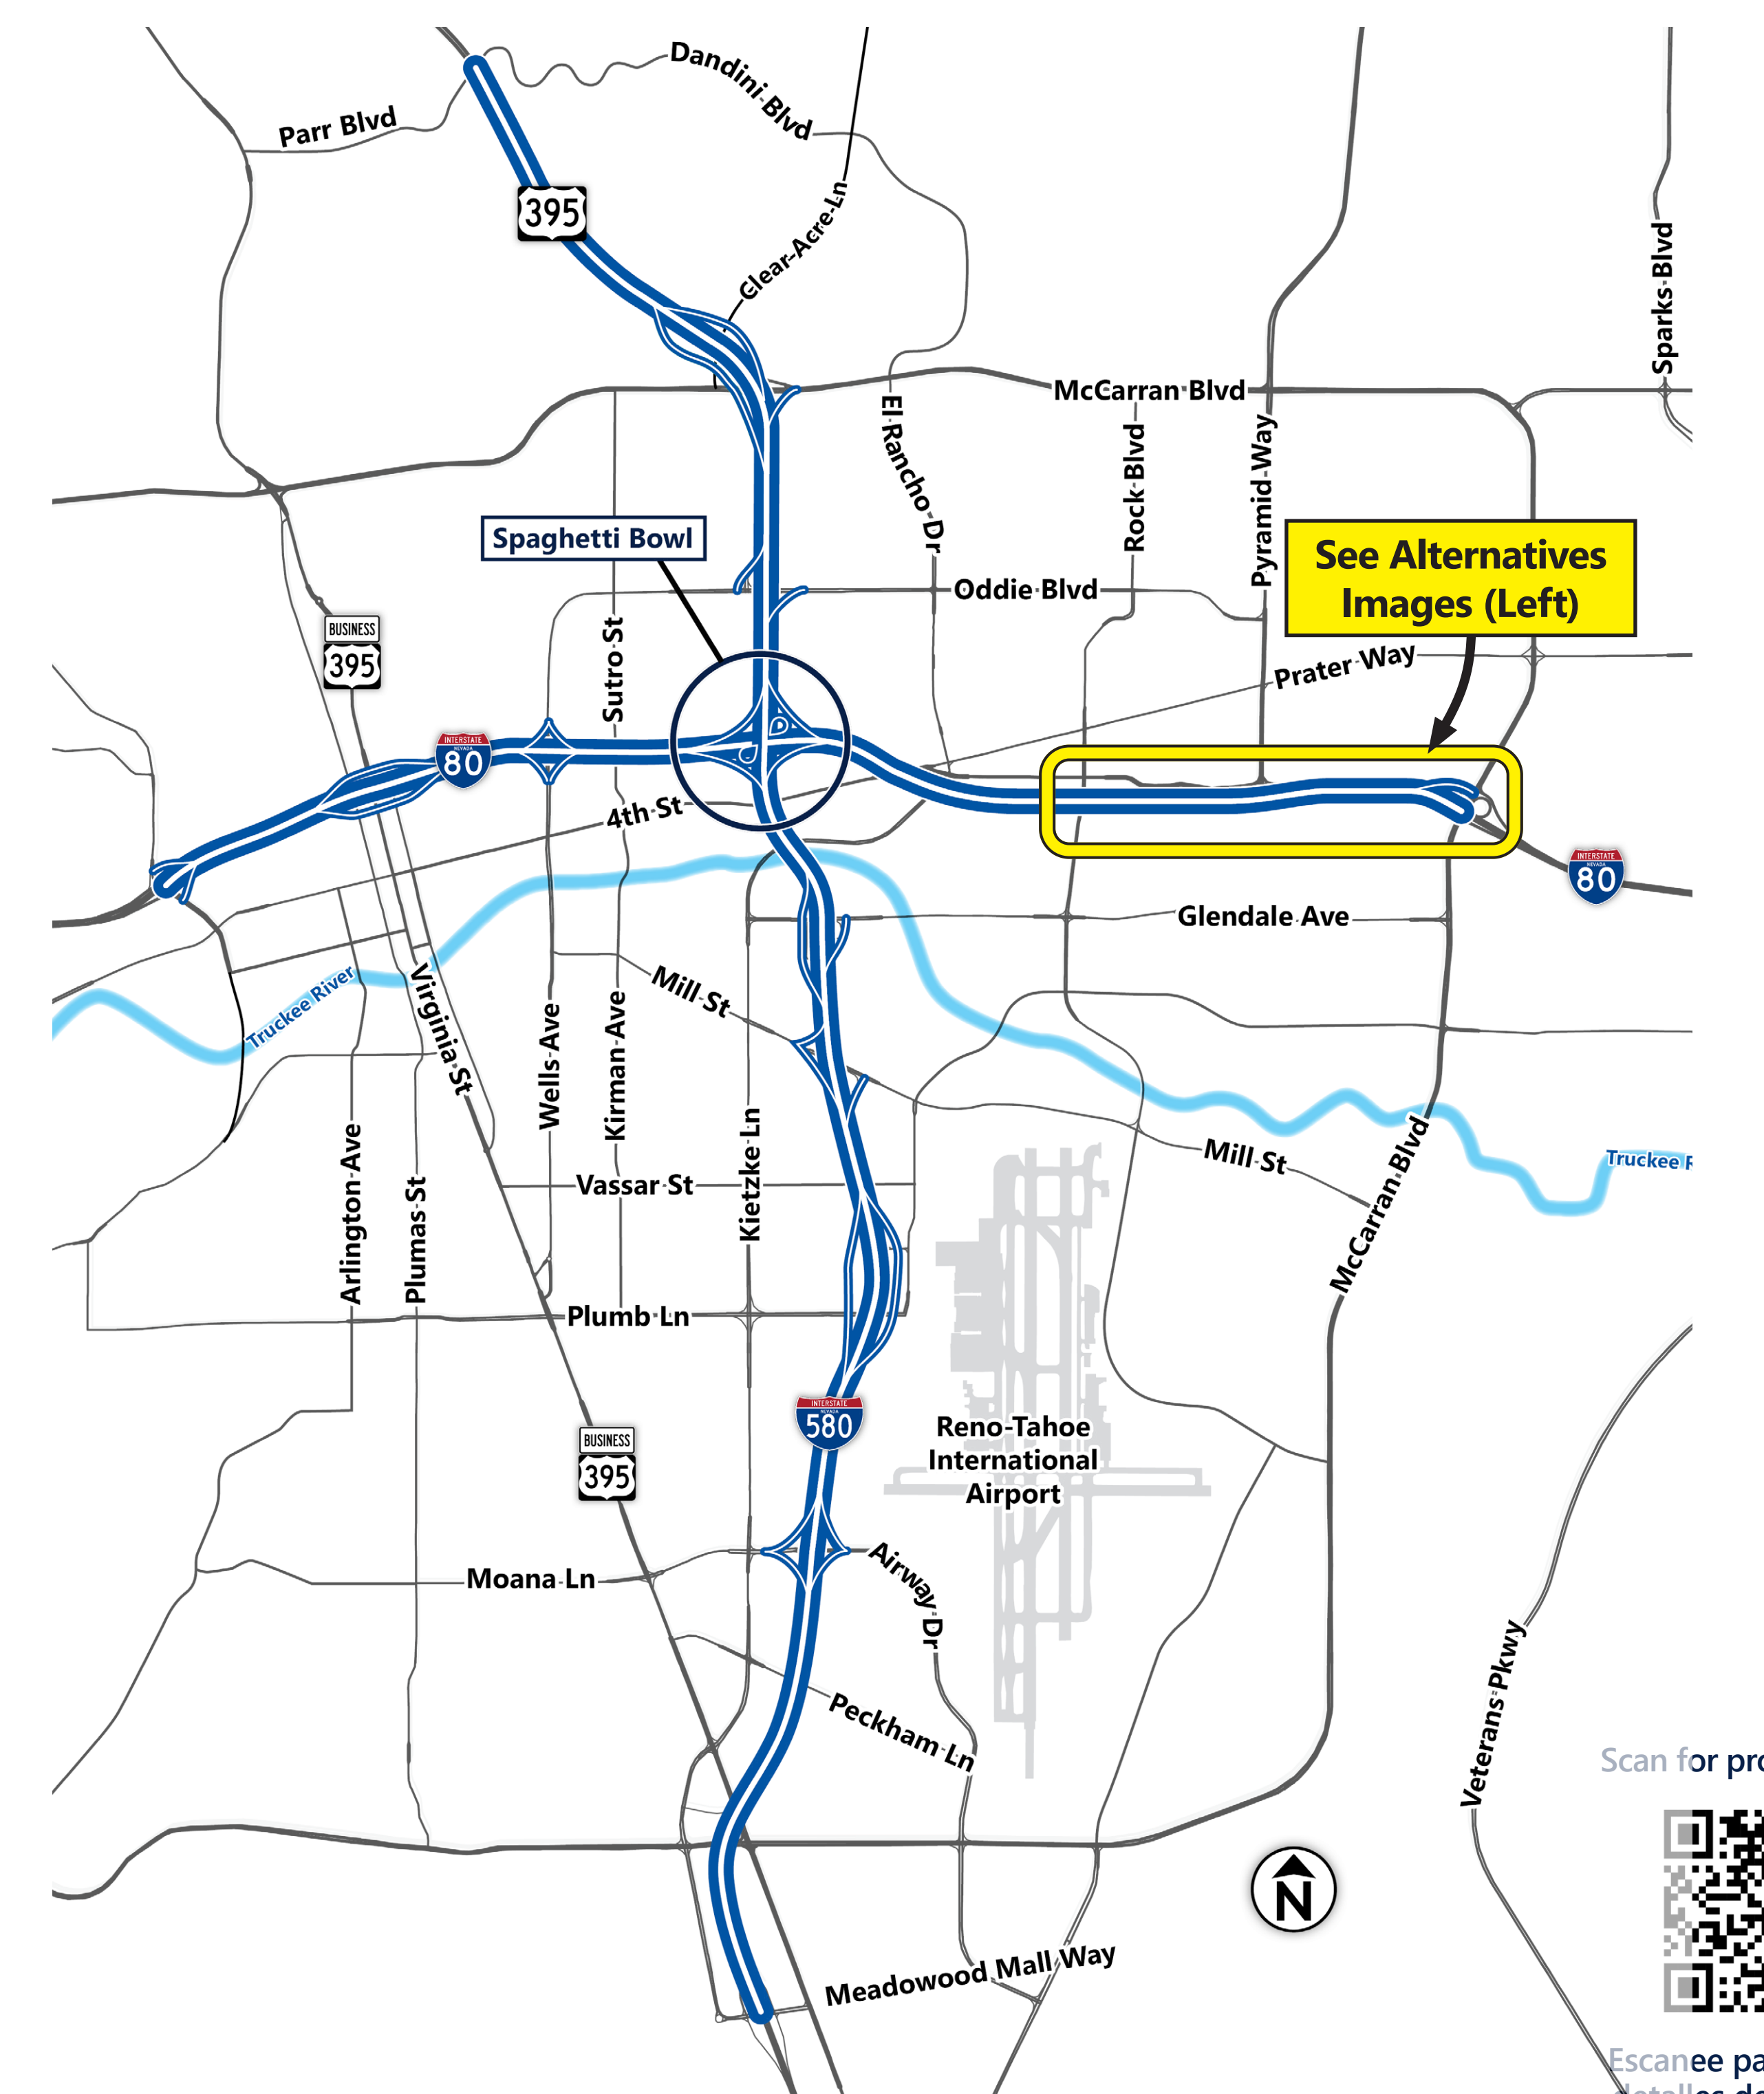

The design modification realigns I-80 to the north from approximately Rock Blvd to Pyramid Way, a distance of about 1/2 mile.

## Victorian Ave and Victorian Plaza – Looking South

## Visual Rendering of Design Modification – Looking South

## Truckee Meadows Crossroads Theme for I-80

- Continue the Truckee Meadows Crossroads theme by highlighting the region's distinctive flora and fauna. This theme will be reinforced through new relief patterns in concrete walls, along with artistic metal panels and thoughtful paint color selections
- Continue the use of weathering steel, stainless steel, colorful metalwork, stone veneer, rock walls and decorative rock.

## Railroad Theme for Victorian Square & Pyramid

- Continue the existing historic railroad theme established for Victorian Square
- Develop an architectural style for new highway structures that draws inspiration from historic local buildings, including the roundhouse, railroad machine shop, and train station.

PRELIMINARY, SUBJECT TO CHANGE

## Truckee Meadows Inspired Wall Patterns

Incorporates a depiction of a bald eagle descending toward the river or a formation of quail in flight, accompanied by marsh-grass patterning and stylized water elements representing the Truckee River.

## Historic Railroad Inspired Bridge and Walls

### Wall Patterning:

Railroad spikes are arranged in an artful configuration, creating a distinctive concrete pattern, complemented by an alternating brick motif. The design remains visually legible at slower speeds.

### Bridge Architecture & Elements:

Structures are painted in the designated corridor color, with opportunities for integrated lighting to enhance visibility. Architectural treatments are incorporated directly into the bridge design, creating a unified and visually coherent structural expression.

### Ground Plane Treatments:

Decorative rock, stamped, colored concrete paving are incorporated as ground plane hardscape treatments.
